

Folding a "NIJER" tent

1. Hank all the guy lines as you strike. Lay the tent out on its side. Smooth out the canvas gently pulling from all sides to get rid of any creases.

2. Square the canvas shape by folding over the doors. Pull them over with care to keep their canvas as smooth as possible

3. Fold the tent up by a "THIRD" always fold the 'cut' in first. Take the guys from the underside & lay them on top of the canvas as shown.

4. Fold in the top (Ridge) edge by a "THIRD", gently pull (keep it on the ground) from both ends to achieve a long smooth shape.

5. Fold in both "ENDS TO MIDDLE".

6. Fold over in half (Note: only ever fold in half after the Thirds & ends to middle has tidied the guys/sodcloths etc to a clean shape)

7. Check the folded tent size against the tent bag,
8. in this case make another fold in half to match.

9. Best practice is to invert the tent bag over the folded tent & then roll over & lace up from centre to the ends, tie clove hitch on handle.
